For Prolific:

The Illusion Game

£xx 45 min £ xx.xx/h X places remaining

This experiment contains various **tasks** and **questionnaires** about you and your personality.

For one of the tasks, you will need some **headphones** to follow a series of **instructions**. Please find a comfortable position and make sure you are at a sufficient distance to hold your hands in front of you without touching anything.

The other task is a game of speed and reflex. You will need to make **visual judgments** (for instance, select which one of the two circles is the biggest, or which line is the longest), as fast and correctly as possible, while **resisting different visual illusions.**
